Cleaner Energy Saving Mediterranean cities

CES-MED

A project implemented by
Human Dynamics Consortium

Cleaner Energy Saving Mediterranean Cities

1. Project objective

- Enabling municipalities and governorates in eight countries to prepare and finance studies and priority sustainable energy actions plans, under the country supervision.

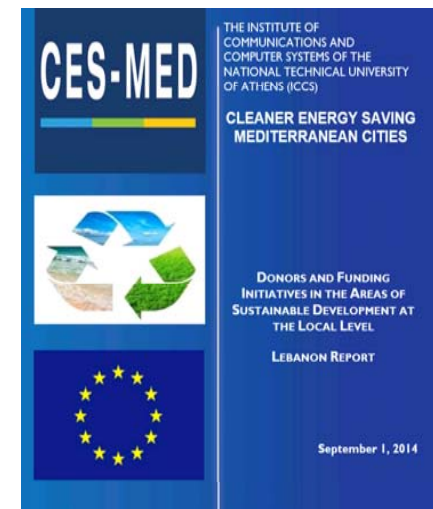

Promote Alternative and Renewable Energy, Energy Efficiency and their applications in different areas: water, waste water, transports, housing...

- Result: Financial saving through energy consumption savings; healthy living environment and a better life to the population.
- Benefit from Global and International experience in Sustainable Energy and facing Climate Change

2. Implementation Steps and Progress (1)

- Partnership with national Focal Point for the project
- Formation of NCG by from the concerned government authorities
- Preparation of National Recommendations Reports
- Pilot 3 municipalities to prepare Sustainable Energy Action Plan (SEAP)
- Association of additional municipalities
- Identification of a “sustainable energy team”
- On-the-Job training for the preparation of the Plans; Detailed Guidelines
- Elaboration of a “Sustainable Energy Action Plan” (SEAP) for each municipality
- Establish the SEAP/SECAP Support Mechanism and Municipality Support Units
- Coaching to prepare SECAPs to new cities and Region

3. Implementation Steps and Progress (2)

- Prepare and disseminate detailed tailored manuals (INFO KIT)
- Update of National Recommendations Reports, to identify additional funding and SSM
- Hold funding workshops
- Set a SEAP Support Mechanism and a SSM Unit
- Simplifies templates for self-preparation of SEAPs
- Hold Communication and Awareness events
- Training and Training of Trainers including on Communication and Awareness
- Put 24 projects in the pipeline of funding by national and external sources
- Preparation of a documentary Film
- Adapt the CES-MED website as learning forum

2. PROJECT BASIS

- National / local / Global partnership
- Coordination with COM and Global COM
- All project activities take place in the municipalities under national supervision
- SEAPs and their actions are stemming from national plans and
- Emphasis on Awareness Raising actions and Funding
- The trained team in each municipality is the responsible of the SEAP
- The proposed actions are to be realistic and applicable
- The proposed actions are designed to be replicated
- Identification of projects financing sources (Public, Private sector, donors...)
- Planning for institutional strengthening and sustainability.

4. CES-MED associated cities

- **With CES MED support, a total of 28 cities have prepared their SEAP/SECAP so far (a total population of 6.15 million people), and in line with JRC methodology.**
- **51 municipalities/regions have adhered to the Covenant of Mayors and are to be coached to prepare plans**
- **155 are planning to join and prepare SEAPs with CES-MED Guidance**
- **Raising demand by association of cities and/or union of municipalities to join and prepares SECAPs in each country.**

5. Partners in Lebanon

Thank you our key collaborators in Lebanon:

- EUD
- Ministry of Interior and Municipalities
- Ministry of Energy / Ministry of Environment / UNDP SEDRO / Lebanon Green Building Council

Municipalities and Union of Municipalities (38)

- Baakline
- Beirut
- Kab Elias

And 36 other cities: Menjez / Aachkout / Jezzine / Hasbaya / Batloun / Kawkaba / Kherbet Rouha) / Union of Chouf Soueijani (9 municipalities) / Union of High Chouf (10 municipalities) / Bechmazzine /
