## CARLIEUKLIMA Srl

Founded in 1955 and specialised in sheet metal working, CARLIEUKLIMA has evolved its activities to become today one of the leading companies in the HVAC market at both European and global levels.

CARLIEUKLIMA produces heating and cooling systems for industrial, commercial sports areas and worship places, as well as conditioning systems for schools, hospitals and civil environments of all sorts, using mainly radiance as a heating/cooling transfer principle. Inside the company, the product develops starting from a customer's need, is developed through a project within the research and development department, to turn into a prototype subjected to preliminary tests. Then follow product certifications and production. The entire production follows strict protocols to achieve the highest level of safety, energy saving, sustainability, comfort and durability. All the products, made of first-quality raw materials, have obtained CE certification for European Union, the EAC certification for the Eurasian Customs Union and other certifications for EXTRA EU countries. Moreover, the company is ISO 9001:2015 (Quality Management System Certificate) certified.

The headquarters of CARLIEUKLIMA are located in a thriving centre of industry in the North East of Italy. Its dealers are located all around Europe and are present as well branch offices in Russia and China.
